

Monoclonal Anti- Brain natriuretic peptide, BNP (Capture Ab)**Catalog#** BDA1028**Lot #** Check on the product label**Size** 1 mg**Isotype** IgG2b**Clone #** B4**Host** Mouse**Reactivity**

Human

Product Form Liquid**Purification & Buffer**

Protein A or G purified and supplied in 0.01 M PBS (pH7.4) without preservative.

Purity >95% by HPLC & SDS-PAGE**Immunogen** Recombinant BNP protein.**Recommend Application**

ELISA

Chemiluminescent immunoassay, CLIA

Other applications have not been tested.

The optimal dilutions should be determined by end user.

Matched antibody pair

Capture Ab: BNP mAb (clone # B4)

Detection Ab: BNP mAb (clone # 2D6)

Storage Instruction

Aliquot and store at -20°C for long term (at least one year).

Avoid repeated freeze and thaw cycles.

Background

Brain natriuretic peptide or B-type natriuretic peptide (BNP) (also ventricular natriuretic peptide or natriuretic peptide B) is a 32-amino acid polypeptide secreted by the ventricles of the heart in response to excessive stretching of heart muscle

cells (cardiomyocytes). BNP is secreted attached to a 76 - amino acid N-terminal fragment in the prohormone called NT-proBNP (BNPT), which is biologically inactive. BNP is synthesized as a 134-amino acid preprohormone (preproBNP), encoded by the human gene NPPB.
